

GP Surgery websites available for only £139 per annum.

ABOUT FORBES WEBSITES

We are a family owned and run technology company, specialising in low cost website design and development for the medical industry and small businesses.

We offer everything from starter websites to get a presence on the internet, through to fully featured website applications and electronic commerce solutions.

We specialise in deploying Google tools and services for our clients, including Google Apps Email and Calendar accounts, Google AdWords marketing campaigns, and Google Analytics Website visitor tracking and statistics.

Professional GP Surgery Websites

Our service

We offer professionally designed websites for GP Surgeries, including all hosting, maintenance and administration, with unlimited updates throughout the year – for the low price of £139 per annum. There are no setup costs, no hidden charges and no advertisements on your website.

Your website

A professionally designed website template allows us to keep the cost low whilst providing a premium quality website for your practice.

As standard, we include the following pages: Home, Appointments, Staff, Clinical Services, Dispensary, Community Staff, Other Information, Useful Links, Code of Conduct and Contact Us. As part of our service, the template can be modified to include more or less pages, as you require.

Google Maps are incorporated in the Contact Us page, with your surgery location. This feature can provide instant directions on GPS enabled smart phones.

EMIS Access online integration. If your surgery is using EMIS Access, we can integrate this into your website, enabling patients to book appointments and order repeat prescriptions from your site. There are no extra charges for this service.

Links to the NHS and other useful health related websites, including any additional links you may require, and/or would be useful for your patients.

Featured Works and Examples

Other Key Features covered by your single payment of £139 per year

Unlimited updates throughout the year. If you have staff changes, new information, practice leaflets, etc, just drop us an email with the new details and we will keep your website up to date.

A domain name for your practice, such as, www.yoursurgeryname.co.uk to ensure you project a professional image on the internet.

We abide by all Google quality standards to ensure your website can be indexed and searched by Google. Once your website is live, we progress with Google indexing and registration to ensure your site is included in Google Search and can easily be found by your patients.
